PROFESSIONAL SUMMARY

Detail-oriented Full-Stack Web Developer skilled in creating robust web and mobile applications tailored to diverse user needs. Complemented by hands-on experience in server deployment and management, with the ability to independently host and configure applications on Virtual Machines. Adept at delivering seamless end-to-end solutions, optimizing both frontend user experiences and backend system stability.

SKILLS

- **Programming Languages:** JavaScript, TypeScript, PHP, Python, Kotlin, Dart
- **Web Development:** Next.js, React.js, Vue.js, Laravel, Filament, Express JS, RESTful APIs, GraphQL, Tailwind CSS
- **Mobile Development:** Flutter, Android SDK, Jetpack Compose
- **Tools & Databases:** MySQLWorkbench, Postman, Git/GitHub, Docker, Nginx, MySQL, PostgreSQL
- **Soft Skills:** Problem Solving, Troubleshooting, Project Management, Leadership, Team Collaboration

WORK EXPERIENCE

BP UBIKAR UNDIP – IT Staff | September 2025 – Present

- Developed Aroomi, a comprehensive web-based venue and asset rental application built with Laravel and Livewire, designed to streamline the reservation process for university facilities and equipment through a dynamic and reactive user interface.
- Built a robust administrative dashboard using Filament PHP and Livewire, enabling real-time management of rental inventory, booking schedules, and multi-level user permissions with seamless interactivity.
- Architected and optimized relational database schemas while leveraging Livewire-driven components to handle complex rental workflows, ensuring data integrity and high performance for concurrent booking requests within the UNDIP ecosystem.
- Developed and managed the official profile website using WordPress CMS, overseeing theme customization, plugin integration, and regular maintenance to ensure optimal performance and up-to-date information.
- Provided comprehensive IT technical support, including hardware troubleshooting, network infrastructure maintenance, and software installation to support daily departmental operations.

PT Rekayasa Agromarin Indonesia – FullStack Web Developer (Internship) | Jul 2024 – May 2025

- Developed a progressive web application called Dokter Ikan, designed to assist fish farmers in detecting fish species, diagnosing diseases using AI, and consulting with aquaculture experts.
- Designed and implemented responsive UI using Next.js and Tailwind CSS to ensure optimal accessibility across devices.
- Built backend APIs and server-side logic using Express.js, integrating AI services for species identification and disease diagnosis.
- Integrated frontend and backend via RESTful APIs, enabling seamless data flow and real-time interaction.
- Conducted thorough testing to ensure system reliability, cross-browser compatibility, and responsiveness in field usage scenarios.

Bangkit Academy led by Google, Tokopedia, Gojek, & Traveloka – Mobile Development Cohort | Sep 2024 – Jan 2025

- Gained in-depth knowledge of mobile app development, UI/UX design, and performance optimization through structured learning modules and hands-on projects from Dicoding.
- Completed challenging final projects and practical labs using Kotlin and Android Studio, enhancing skills in building responsive, high-performance mobile applications.
- Strengthened understanding of modern Android development practices through participation in the Bangkit Academy Mobile Development Cohort 2024 Batch 2.

CV. Arshaka Jaya Kreasindo – Backend Web Developer (Internship) | Dec 2023 - Feb 2024

- Developed a web-based tour package reservation system during the internship program.
- Designed and built RESTful APIs using Laravel PHP to handle reservation logic and data transactions.
- Implemented server-side business logic and database interactions using Eloquent ORM.
- Integrated front-end interfaces with backend APIs, ensuring seamless user experience and data flow.
- Conducted testing and debugging to ensure system reliability, performance, and compatibility.

PROJECT EXPERIENCE

DipoCheck: Document Authentication System for Klinik Pratama Diponegoro 1 – Fullstack Developer | Apr 2026 – May 2026

- Developed "DipoCheck," a specialized web application for Klinik Pratama Diponegoro 1 designed to validate and verify the authenticity of medical certificates and documents, preventing forgery within the university environment.
- Engineered a high-performance backend using FastAPI to handle rapid validation requests and data processing, integrated with a dynamic and intuitive frontend built with React to ensure a smooth user experience for both staff and external verifiers.

- Implemented secure verification mechanisms, such as QR code integration, and managed the end-to-end deployment of the system on private servers, optimizing the server environment to ensure data security and high availability for clinic operations.

Aroomi: Web-Based Venue and Asset Rental System for UNDIP – FullStack Developer | Oct 2025 - Des 2025

- Developed "Aroomi," a comprehensive rental application using Laravel and Filament PHP, designed to digitize and automate the reservation process for university venues and assets within BP UBIKAR UNDIP.
- Built a robust administrative dashboard featuring multi-level user permissions, real-time inventory tracking, and automated booking management to increase operational efficiency.
- Architected relational database schemas and developed a responsive user interface using Laravel and Tailwind CSS, ensuring a seamless end-to-end user experience for both students and university administrators.

Capstone Tugas Akhir: Perancangan Progressive Web Application “Dokter Ikan” untuk Deteksi dan Identifikasi Penyakit pada Ikan Budidaya Air Laut Berbasis AI – FullStack Developer | Aug 2024 - May 2025

- Developed a Progressive Web App using Next.js and Express.js for fish species and disease detection in marine aquaculture.
- Integrated AI model (YOLOv11 in Pytorch) and an expert system for disease diagnosis based on user-input symptoms.
- Implemented offline functionality with IndexedDB and optimized the app for low-connectivity environments.

Program Capstone Bangkit 2024: NutriSense – Personalized Nutrition Tracking and Dietary Insights – Mobile Developer | Nov 2024 – Dec 2024

- Developed NutriSense, a mobile application built with Kotlin to help users monitor and manage their daily nutritional intake.
- Integrated a facial shape prediction API to personalize user experience, utilizing cloud infrastructure hosted on Google Cloud Platform (GCP).
- Implemented local data storage and API-based services to support offline access and real-time recommendations.

Arshaka Tour Travel Package Reservation Website – Back-End Developer | Dec 2023 – Feb 2024

- Developed and maintained the backend system for the travel package reservation website using Laravel and MySQL.
- Designed and implemented RESTful APIs.
- Integrated backend services with the React.js frontend.
- Optimized database queries and ensured data integrity.

EDUCATION

Diponegoro University – Bachelor of Computer Engineering | 2021 – 2025

GPA: 3.77/4.00

ORGANIZATION EXPERIENCE

Al Muharik – Islamic Student Organization, Computer Engineering Department | Sep 2022
- Jun 2023

- Supported religious and spiritual development programs through effective internal and external communication strategies.
- Handled internal announcements and external outreach to enhance student participation and visibility.
- Strengthened skills in communication, media coordination, and team collaboration.
